

trial (sorted by steering-activity onset; n = 491)

- | Manual_Start (mode switch)
- steering-angle activity onset (provisional)
- ▲ left-indicator onset (provisional; channel undocumented)

- validated lane crossing (16 beyond 16 s drawn at the edge)
- ▨ R3B assumed braking-delay interval (1.15–3.0 s) — model assumption
- R3B supplementary upper bound (4.0 s; sensitivity only)
